Sea Freight Update

Coastal Services - Fremantle to East Coast

Although there isn't a direct Coastal service from Fremantle to the Eastern states, did you know that we can offer services from West to East via Singapore?

We understand that rail transport may not always be suitable, and if a longer transit time (ranging from 29-39 days depending on transshipment connections and the port of destination) is acceptable, this service could be a viable option. Additionally, we are providing services to many clients to Dampier, Darwin and Townsville on this same transshipment basis.

Feel free to reach out to our Sales Team who can provide further information and help plan your next move.

Plan your Easter Shipments today to avoid potential delays.

This year Easter and Anzac Day are falling back-to-back, with a shortened week commencing Monday 14/04 followed by a 3-day working week.

Please keep this in mind when planning your upcoming movements, as there may be limited availability over this period.

The more notice we have to plan your shipment, the better situated we'll be to meet your specific needs.

Coastal Schedule

Plan smarter with our New Rail Calculator

Did you know our recently updated website now features a Rail transit calculator?

Simply enter your departure and destination cities, and receive instant transit time estimates, making your freight planning faster and easier than ever before.

Fun Fact

Freight Forwarding isn't a new concept. It dates back to the 1800's when Thomas Meadows, one of the first freight forwarders, established his firm in London. These pioneers laid the groundwork for modern logistics by organising shipments and managing customs paperwork.
